

LEAD RENOVATOR TRAINING

Lead Initial Renovator

The EPA RRP rule affects contractors, property managers and others who disturb known or presumed lead-based paint during renovation. The term renovation covers all activities done for compensation that disturb painted surfaces including most repair, remodeling and maintenance activities, such as window replacement, weatherization and demolition. The RRP rule applies to all renovation work performed in residential houses, apartments and child-occupied facilities such as schools and day-care centers built before 1978. Training, certification, and work practice requirements in the Renovation, Repair and Painting Rule are effective April 22, 2010. Pre-renovation education requirements are effective now!"

Firms must have one or more "Certified Renovators" assigned to jobs where lead-based paint is disturbed. To become certified, a renovator must successfully complete an EPA or State-approved training course conducted by an EPA or a State-accredited training provider. The Northern MN Builders Association has partnered with the University of ND, Environmental Training Institute to offer this training. ETI is an approved trainer. All renovation workers must be trained. Renovation workers can be trained on-the-job by a Certified Renovator to use lead safe work practices, or they can become Certified Renovators themselves.
